Disclaimer
Of necessity, the outer jurisdictional district boundaries shown here are based on Census block geography (rather than {School District Name} geography) and are approximations of the boundaries as implemented by election officials.

A Census block is the smallest geographic census unit. Blocks can be bounded by visible features such as streets, roads, streams, and railroad tracks, and by nonvisible boundaries, such as selected property lines and city, township, school district, and county limits. Census blocks change every decade.
